

# Satish Sawant

SOFTWARE ENGINEER II

**Pune, IN | 7350127619 | sawantss.77@gmail.com |**

<https://www.upwork.com/freelancers/~01ecbee254ba869c8c?viewMode=1>

## Professional Summary

---

**Software Developer** with **9+ years of experience** in designing, developing, and delivering scalable web applications and enterprise software solutions using **.NET, .NET Core, C#, Node.js, React Js, and AWS**. Strong expertise in developing **RESTful and GraphQL APIs**, backend architecture, cloud deployment, database optimization, third-party API integrations, and performance improvement. Experienced in **leading development teams, mentoring engineers, troubleshooting complex technical issues, and delivering high-quality software solutions** in Agile environments. Proven ability to translate business requirements into scalable, maintainable, and reliable applications while contributing to continuous improvement and digital transformation.

## Experience

---

**Wiser Solutions | Software Engineer II**

**Nov 2025 - Sept 2026**

- Provided **application support and development**, troubleshooting customer issues, resolving production bugs, and implementing application enhancements based on business requirements.
- Developed a **Python-based web data extraction tool**, creating scripts to extract structured data from HTML and automate website data collection.
- Implemented automated **website screenshot capture and validation**, and analyzed HTTP requests using Postman to improve data extraction reliability.

**Realisieren Technology | Senior Software Developer**

**May 2018 - Oct 2025**

- Led a team of backend developers in designing, developing, and maintaining scalable, high-performance applications using **Node.js, PostgreSQL, and MongoDB**.
- Optimized **SQL queries, database schemas, and indexing strategies** to improve database performance, application responsiveness, and scalability.
- Established and maintained **software development lifecycle (SDLC) documentation**, coding standards, development guidelines, and best practices.
- Developed and executed **unit tests** to ensure code quality, application reliability, and functional correctness prior to deployment.
- Integrated and maintained **third-party APIs and payment services**, including **ShipStation and Braintree Payment Gateway**, to enhance application functionality and streamline business operations.
- Collaborated with **UI/UX designers and frontend developers** to improve application usability, user experience, and overall product quality.

**Realizer Technology | Software Developer**

**Aug 2016 - July 2017**

- Designed and developed Android applications using Android Studio, implementing UI screens, application features, API integration, and navigation based on project requirements. Collaborated with the team to develop new features.

## Projects

---

### Project (Brand Protection Agency, Channel Sync) – Wiser (2021-2026)

**Role: Senior Developer | Tech Stack: ASP.net, C#, MSSQL**

- Responsible for maintenance and customer support, handling change requests and resolving production issues as needed.
- It is a E-commerce monitoring tool designed to detect Minimum Advertised Price (MAP) violations across online channels.
- Technology Stack: ASP.NET, C#.NET, MSSQL.
- Contributed to the development, enhancement, and support of the platform during active phases.

### Project (Extraction Tool) – Wiser (2025-2026)

**Role: Software Developer | Tech Stack: Python, MSSQL**

- Developed and maintained an internal **Python-based web data extraction tool** to extract and process structured information from HTML content across multiple websites.
- Analyzed website behavior, HTTP requests, headers, parameters, and responses using **Postman/Insomnia** and browser developer tools to understand data retrieval mechanisms.
- Developed Python-based **HTTP requests** to replicate website requests and retrieve HTML content for automated data extraction.
- Implemented **HTML parsing and data extraction** logic using Python to identify and extract required product and website information.
- Troubleshoot request failures, response issues, and website-specific behaviors to improve the reliability and accuracy of the extraction process.
- Collaborated with the team to analyze new websites and implement **site-specific extraction logic** based on their HTML structure and request patterns.

### Project (OBE Self Service (Content Rule Management)) – Wiser (2024-2025)

**Role: Senior Developer | Tech Stack: React, Nest JS, Prisma, GraphQL, AWS, Docker, Kubernetes**

- Enhanced an internal tool for Wiser users to create and manage business rules.
- **Frontend:** Built using **React**, structured with a **Monorepo framework**.
- **Backend:** **Nest JS**, **Prisma**, and **GraphQL**.
- **Deployment:**
  - Backend deployed using **Docker** and **Kubernetes**.
  - Frontend hosted on **AWS S3**.
  - Both projects deployed via **GitHub Actions pipeline**.
- Focused on building scalable, maintainable architecture for smooth content rule management.

### Project (Mineral View) – Realisieren Technologies (2022-2024)

**Role: Backend Lead | Tech Stack: React, Node.js, PostgreSQL, MongoDB, Braintree, AWS**

- A platform that delivers lease and production data insights to mineral owners and operators.
- Technology Stack: Angular (frontend), Node.js (API), PostgreSQL, MongoDB, Braintree (payment integration).
- Oversaw development using Node.js, PostgreSQL, and MongoDB.
- Provided technical mentorship, performed code reviews, and promoted adherence to best coding practices within the team.

### Project (Bold Precious Metals) –Realisieren Technologies (2021-2022)

**Role: Developer | Tech Stack: React, .net Core, MSSQL, Ship station**

- A US-based e-commerce platform for buying and selling precious metals like gold, silver, and platinum coins and bars.
- Technology Stack: AngularJS (frontend), .NET Core APIs, MSSQL, Ship Station, Braintree Payment Gateway.
- Integrated Ship Station for shipping and Braintree for secure payment processing.
- Contributed to infrastructure configuration, including Cloudflare setup, DNS management, and SSL certificate installation for secure hosting.

### Project (Ansira Web scraping) Ansira (Client) (2018-2020)

**Role: Developer | Tech Stack: c#.net, AWS (Lambda, SQS, S3, EC2)**

Internal project focused on scraping product data and storing it in a centralized database.

- Implemented two types of scraping First-Party Scraping, Third-Party Scraping
- Technology Stack: C#.NET, MSSQL, Python, AWS services (Lambda, SQS, S3, EC2).
- Built a robust, scalable pipeline using AWS (Lambda Function, SQS Queues, S3 Bucket, EC2 Instance. Managed deployment through AWS Code Pipeline to ensure automated, consistent releases.

## Education

## Skills

---

**Languages:** C#, JavaScript, SQL, Python

**Frontend:** React, HTML, CSS, Bootstrap

**Backend:** .NET Core, Web API, Node.js, Nest JS, GraphQL, Prisma

**Databases:** SQL Server, PostgreSQL, MongoDB

**DevOps & Tools:** AWS (S3, EC2, Lambda, SQS, DataSync), Docker, GitHub, Jira, Visual Studio, VS Code

**Other:** Web Scraping, RESTful APIs, Entity Framework, Microservices, Payment Gateway Integration, CI/CD, Unit Testing, Docker, Kubernetes, Agile, Design Patterns, SOLID Principles, MAUI

## Achievements / Certification

---

- Awarded "**Star Performer**" for outstanding contribution, commitment, and performance during the **Ansira Phase I** project.
- Received client recognition for **effective contribution and strong team commitment** on the **OBE Self Service** project.
- Successfully completed an **Android Development** course from **Felix IT Systems**
